Akhilesh Bisht

Full Stack Developer

+91-6399085419 | akhileshbisht2020@gmail.com | LinkedIn | GitHub | Portfolio | Dehradun, India

SUMMARY

Full Stack Developer with 1+ year of experience building scalable, **production**-grade web applications and AI-powered systems. Skilled **in React.js**, **Next.js**, **TypeScript**, **Node.js**, **Python** , and MongoDB, with hands-on expertise in integrating LLM-based features using **OpenAI** and **Gemini** APIs. Proven ability to improve application performance (20%+ faster load times) and deliver end-to-end solutions in Agile environments. Currently expanding into **DevOps** — **Linux**, **Docker**. Seeking Full Stack / Software Engineer roles**.**

SKILLS

Languages & Frontend: JavaScript (ES6+), TypeScript, Python, HTML, CSS, React.js, Next.js, Redux Toolkit, Tailwind CSS

Backend & Database: Node.js, Express.js, RESTful APIs, JWT Authentication, MongoDB

AI & Cloud: OpenAI API, Gemini API, LLM Integration, Azure Bot Service, Azure DevOps

DevOps & Tools: Linux (CLI), Git, Postman, Docker (learning)

EXPERIENCE

Full Stack Developer — Scriptguru Digital Solutions *Sep 2025 – Present | Dehradun*

- Built production-grade web apps using React, Next.js, TypeScript, Node.js, and MongoDB with AI features via OpenAI APIs.
- Architected scalable backend services and integrated AI-powered features leveraging OpenAI APIs.
- Delivered high-performance features cross-functionally with designers and product teams on tight deadlines.
- Deployed a Microsoft Teams bot to Azure Bot Service as part of cloud deployment exploration.

Full Stack Developer Intern — VaishaliTech *May 2025 – Aug2025 | Remote*

- Built a laundry management platform with real-time order tracking, payments, and admin dashboards (React, Node.js).
- Reduced page load time by 20% through optimized API calls and frontend rendering improvements.
- Designed scalable MongoDB schemas for efficient handling of users, orders, and transactions.
- Implemented secure JWT-based authentication with role-based access control.

PROJECTS

ARIA – AI Voice Agent *Next.js · TypeScript · Python (FastAPI) · OpenAI API*

- Built a real-time AI voice agent with speech-to-text, NLP, and context-aware responses using OpenAI APIs.
- Designed microservices architecture for independent scaling of voice processing and frontend layers.
- Implemented low-latency bidirectional communication for seamless real-time voice interaction.
- Built an end-to-end LLM-powered conversational system with scalable backend infrastructure.

Social Media Post Scheduler *Next.js · Zustand · Tailwind CSS · REST APIs*

- Built complete frontend from scratch — auth flow with Context API, protected routes, and session management.
- Integrated Instagram, Facebook, and YouTube APIs for scheduling, publishing, and managing posts across platforms.
- Built post composer with media upload, caption editor, and platform selector with scheduled/draft/published states.
- Implemented multi-workspace support — users can switch between and manage multiple social accounts independently.

EDUCATION & CERTIFICATIONS

- Full Stack Web Development — Udemy (Completed)
- DevOps Foundations — Self-study / Udemy (In Progress)
- Bachelor's Degree — Uttarakhand University | Aug 2022 – Aug 2026
